Bob

Greer is working with REI on the final scope narrative. The information that was sent earlier is our typical approval for PECFA eligible projects.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

John,

Please send the revised SOW. It was not included in your attachments. I received the cost cap and the analyte list.

Thank you.

Subject: Tower Standard Scope of Work

Bob & Sherry

Please see the two attachments below relating to the approved scope of work for REI to collect soil samples and limited groundwater sampling associated with the Tower Standard site. REI is planning on mobilizing on Monday September 14th. Greer Lundquist will be on site during field activities and will have the authority to approve additional work necessary to fully define the degree and extent of soil impacts. Once the soil work is completed REI will be tasked with submitting a scope of work associated with groundwater monitoring. We are anticipating that the scope will be developed within a month of the soil work and drilling will occur in October. I will try to contact the two of you later today to see if you have any questions.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Subject: SOW & U&C Cost Estimate Submittal [REVISION] - Tower Standard RE: Tower Standard

Hello Greer, based on our phone conversation today I have revised the cost estimate to reflect the reduction in proposed drilling footage and number of borings. I have included costs for 35 soil borings with 30 advanced to a depth of 12' and 5 to a depth of 32'. I also reduced the number of soil and groundwater samples. Further U&C reductions were taken for per diems and mobilizations. The variance request was reduced for the second team member hours and estimated time for boring log and abandonment form completion. Additions to the U&C include an access agreement for the Kozak property and additions to the variance request include additional project management time.

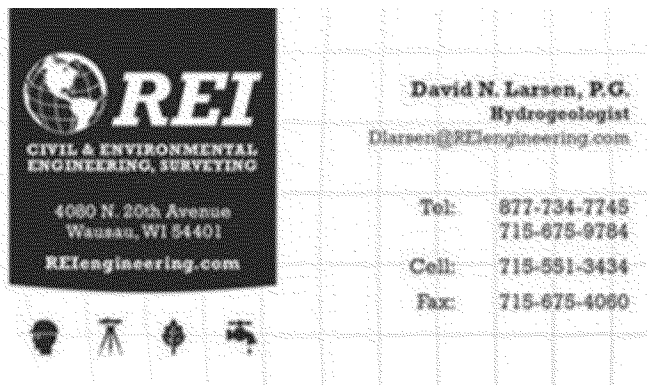

I am also aware that this SOW will likely be revised as the SOW is being completed and final cost approvals will be adjusted in the field. Feel free to contact me with any questions or concerns.

FYI – drilling is tentatively scheduled to begin Monday September 14th.

Thank you,

David N. Larsen P.G

Subject: FW: Tower Standard

Hi Dave,

The approval request was reviewed by all and attached is the concerns and modifications needed – left you a voice mail message also. Mostly the changes involve the number of soil borings and/or depth being that with my presence on site during the work with the ability to approve any borings or sampling deemed necessary it is a bit much. If you have any questions please give me a call.

We have also had discussions with EPA regarding time frame as they want to coordinate efforts and they would like to split sample.

We are committed to service excellence.

Any word on the approval request? I am trying to get access approved and prepare timelines to meet the drilling schedule of September 14.

I have really taken a beating at the hands of the WDNR for not having prior approval before initiating eligible work. Once approval is granted I will be able to undertake the required work.

Thank you,

David N. Larsen P.G
